### About Think Research

Think Research is a dynamic and growing Air Traffic Management and Airports consultancy based in Bournemouth. We specialise in air traffic operational concept validation, simulation, analysis, safety studies and human factors. On behalf of our clients we help to shape the future of air traffic, providing expertise on present and future aviation and air traffic concepts in both the ATM and Airport domains.

Since the company's formation in 2004, the main focus of our business has been on providing consultancy to: pan-national research organisations; world-leaders in the supply of ATM; and a wide range of government and national agencies. In late 2008 Think Research began developing software products that support ATM research, modelling, simulation and analysis using cutting-edge technologies and methods. More information on Think Research may be found on our website ([www.think.aero](http://www.think.aero)).

We are currently expanding from our core European market into the Middle and Far East markets and are looking for additional staff to share in the fun and excitement of growing the company in this challenging time.

### Lead / Senior Analyst

To support our rapidly business needs, we are looking to recruit an experienced Lead Analyst or Senior Analyst who is able to immediately take on a leading and highly responsible role within the company. You will be expected to have a firm understanding of both today's and tomorrow's ATM systems and be able to lead detailed technical discussions with a wide range of international customers. You must be able to demonstrate the ability to convey technical results to a non-technical audience.

You will have experience in the preparation, conduct, analysis and reporting of ATM and airport simulations, including real time and/or fast time with a knowledge of the validation techniques applicable to both types of simulations. An understanding of the E-OCVM would be a significant advantage. We would expect you to have conducted a wide range of investigations relating to ATM and Airport related studies.

You will have taken the lead on high-profile projects, demonstrating a keen Project Management approach to business with an understanding of bringing the project in within budget. You will be able to identify risks and methods of mitigating them.

Think Research prides itself on taking an innovative approach to the way they do business. We will expect you to be able to demonstrate an innovative way of approaching your work and to actively contribute to the way we work, the way our products work, the way the industry works, and to always be on the lookout for ways in which all of those can be done better.

## Skills and Qualifications

To meet these exacting roles, the successful candidate will, at a minimum, possess the following skills and qualifications:

- A strong degree level qualification in a numerate, analytical or engineering / aerospace discipline;
- Approximately five years' experience within the aviation/aerospace/airports industry;
- Experience in data analysis, mathematical modelling and statistics;
- Experience in planning, running and analysing large scale simulations;
- A strong understanding of the Air Traffic Management industry;
- Extensive understanding of operational concept research, development, and implementation;
- In-depth knowledge in the use of all MS Office products, including MS Project;
- Project Management experience;
- Experience in leading and running teams;
- Excellent communication skills and an ability to convey technical results to a non-technical audience;
- The aptitude and attitude required to work in a small, growing consultancy;
- Eligibility to work in the UK and to pass the security screening procedure;
- The willingness to work overseas.

## Apply Now!

In today's economic environment, the chance to work within a growing company and to influence an exciting, international industry is rare. Think Research offers opportunities that can't be found in other, larger companies or consultancies. You will have:

- The opportunity to be a key constituent of the team, with levels of responsibility exceeding that you will find elsewhere;
- The opportunity to help shape and expand the consultancy and the aviation industry;
- An individually tailored development plan based upon company and personal needs;
- European and worldwide travel opportunities.

If you believe you have something unique to offer us, send a CV and covering letter stating salary expectations, motivation for application and why you think you meet the requirements to [jobs@think.aero](mailto:jobs@think.aero) or call Conor Mullan to discuss: +44 (0) 1202 247 204.
