1 Summary

Job Title	Senior Consultant
Salary	£40,000 - £60,000 Dependent on experience
Location	Bournemouth, UK

2 About Us

Think Research is a global Air Traffic Management and Airports consultancy headquartered in Bournemouth, UK and with a subsidiary in the Middle East. We specialise in improving our client's operational performance and in conducting regulatory, strategy and policy analysis. In the 17 years since the company started we have worked with 70 clients from 33 countries across 5 continents.

Even in today's challenging market, we are a growing consultancy with ambitious growth plans. We have achieved strong growth through:

- High client retention
- High staff retention
- Exceptional track record of delivery

The input of our staff into the company, its direction and its growth are key to us and we offer:

- Competitive rates of pay
- Above average pension scheme
- 36 Days holiday (inclusive of UK Bank Holidays)
- Tailored career development and performance reviews
- Targeted training and continuous coaching
- Generous Maternity & Paternity pay
- Company Sick Pay scheme
- Paid charity leave (up to a maximum of 5 working days)
- Flexible working options available
- Worldwide travel opportunities

We are now looking for experienced candidates to support the growth of our team. As a consultant with us you will be involved in a variety of interesting projects for clients around the world, be expected to build and manage client relationships and maintain the standards that we expect on each assignment.

3 Suggested Profile

Candidates for this position should be ambitious and interested to learn more about the workings of the aviation industry. You should have a numerate degree (e.g. engineering/science preferred) and at least 5 years' work experience, which could be in a variety of backgrounds e.g. in aviation consultancy, with an airport, within an ANSP, a research organisation or a regulatory body.

You will already have developed significant experience in certain aspects of the industry from policy or regulations through technology and operations, as well as having an excellent understanding of how airports, Air Traffic Management, UAS and airlines fit into the overall aviation industry.

Our projects cover a variety of areas such as safety management, investment appraisal, airspace & airport capacity, environmental matters, data analytics, performance assessment and aviation regulations. Experience in any of these areas would be considered particularly advantageous.

You should be confident working on complex problems within multidisciplinary and international teams and able to comfortably work with data in analysing problems. Being able to code would be helpful, although not essential.

As a consultant you will be expected to contribute towards the growth of the company through prospecting, bidding and winning new consultancy projects. Therefore, demonstrable experience in writing bids and reports for decision makers would be considered advantageous.

We need our consultants to have excellent written and verbal skills. Most importantly you will be an ambitious, flexible and above all personable candidate able to communicate confidently, adapt quickly and act on your own initiative.

We're not a big, process heavy bureaucracy so if you are looking for a well-worn, fully mapped out career route we are likely not for you. If on the other hand you like challenge, working on the edge of your comfort zone and the diversity of opportunity that comes from being part of a growing SME then we can give you a fantastic environment in which to turbo-charge your career.

4 How to Apply

To apply for this position please send a cover letter expressing your reason for applying for the role and your CV to jobs@think.aero. Please also include the title of the position you are applying for within the email subject line.

We would expect candidates who are selected for interview to prepare and deliver a presentation on a topic of our choosing. We would expect new recruits to be able to be based at our office in Bournemouth.
